

For Immediate Release: September 2026

RB10 Factory Team Retro Kit

#90060

ELECTRIC ■ OFF ROAD ■ 1:10 SCALE ■ 2 WHEEL DRIVE ■ KIT

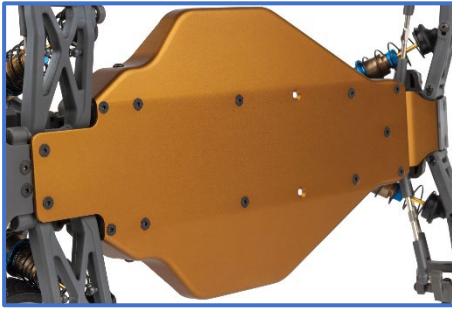

Retro style. Modern performance.

The Team Associated RB10 Factory Team Retro Kit blends classic off-road buggy styling with proven B5 engineering for a true old-school look backed by modern durability and adjustability. Featuring a rear-motor layout, the RB10 Factory Team Retro delivers familiar handling characteristics with updated materials, race-ready components, and some Factory Team upgrades.

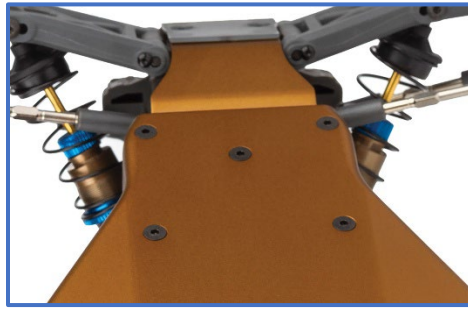

At its core is a Retro Bronze anodized aluminum B5 tub chassis, paired with a matching Retro Bronze aluminum front nose plate and exclusive grey molded plastics throughout for an unmistakable vintage appearance. An authentic retro Viper body and high-downforce 5.5" retro wing complete the classic silhouette, while 12mm hex dish wheels and your choice of tires (not included) ensure confident performance on today's tracks.

Under the body, the RB10 Factory Team Retro Kit is all business. Kashima coated 13mm big bore coil-over shocks, a B5 rear-motor Stealth transmission, rear CVA driveshafts, and a 2.6:1 sealed B5 Ball differential provides smooth, reliable power delivery. Fully adjustable suspension geometry, steel turnbuckles, vertical ball ends, and an adjustable V2 slipper system give drivers the tuning range they expect from a modern Team Associated platform.

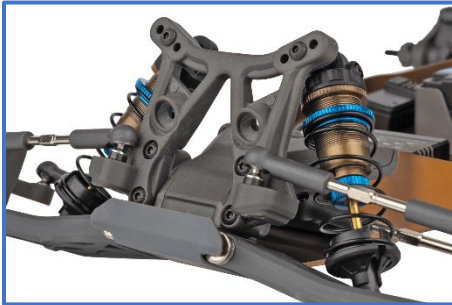

New Retro Bronze aluminum
B5 tub chassis

New Retro Bronze aluminum front
nose plate

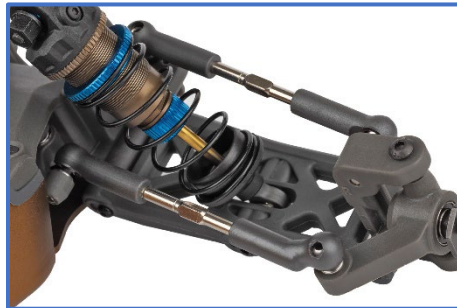

New front and rear molded
bulkhead parts

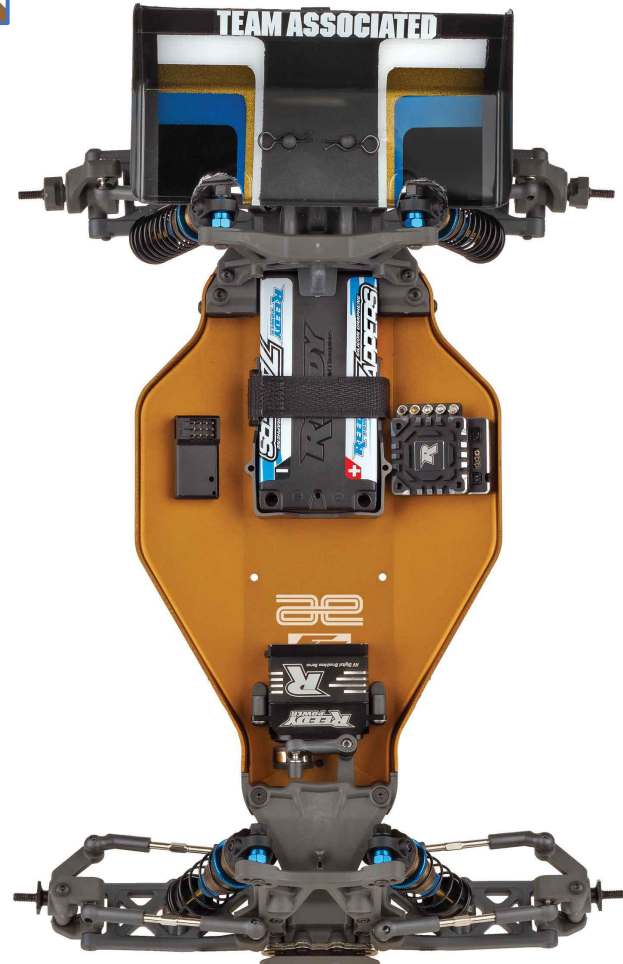

High downforce 5.5" retro
wing included

13mm Kashima big bore coil-over
shock absorbers
