## Champions by Design

Full-scale Formula racing is considered one of the most elite forms of racing in existence, with technology and looks off the chart. AE engineers have assembled a modern re-imagining of the classic RC10F6 FT Kit, introducing fresh elements into a race-proven design, ushering the platform into a new era. With a full cast of setting options, an ultra-low center of mass, and sleek styling, the RC10F6 FT is designed to put you at the front of the Formula grid.
