RC10 Sprint Edition Kit

#6057

1:10 Scale 2WD Electric Off-Road Sprint Car Kit

ELECTRIC ▪ 1:10 SCALE ▪ 2 WHEEL DRIVE ▪ OFF ROAD ▪ KIT

The Icon, Re-Engineered.

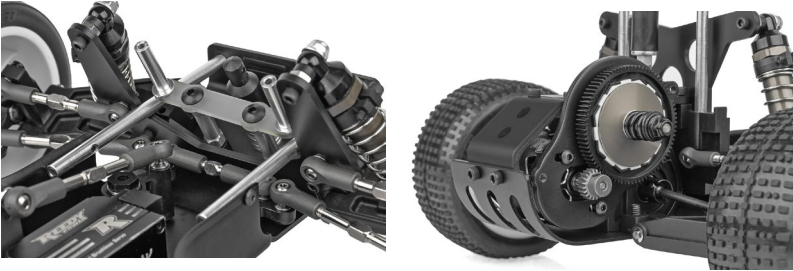

The RC10 isn't just a car; it's the foundation of championship racing. Now, Team Associated takes that winning soul to the oval. The all-new RC10 Sprint Car combines classic pedigree with modern, heavy-duty precision, designed to slide sideways and stay pinned to the cushion.

Built for the Big Show.

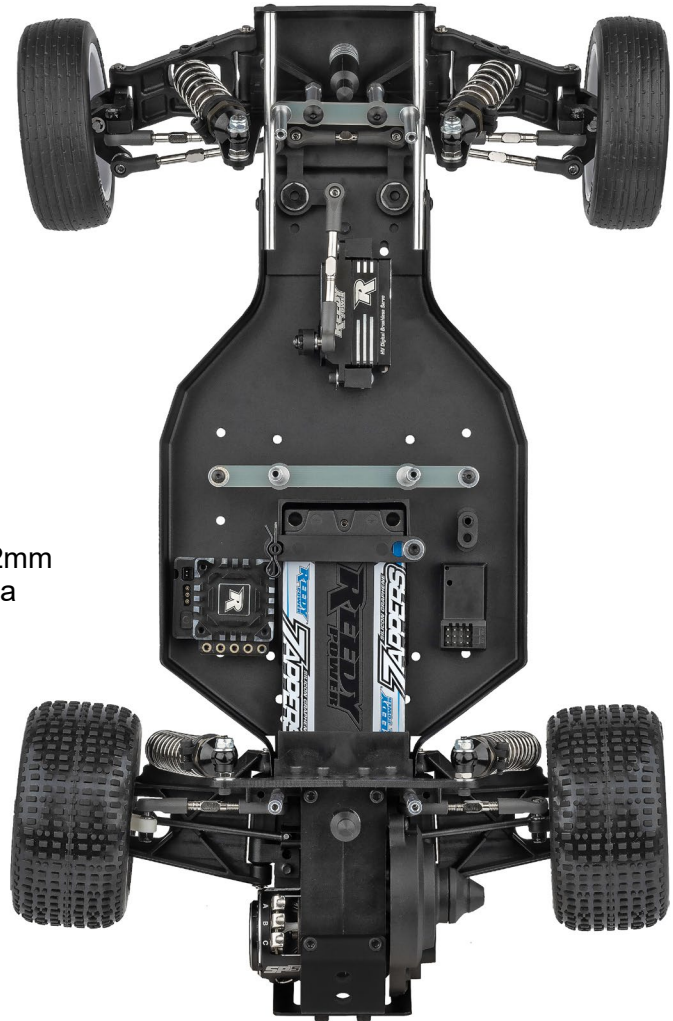

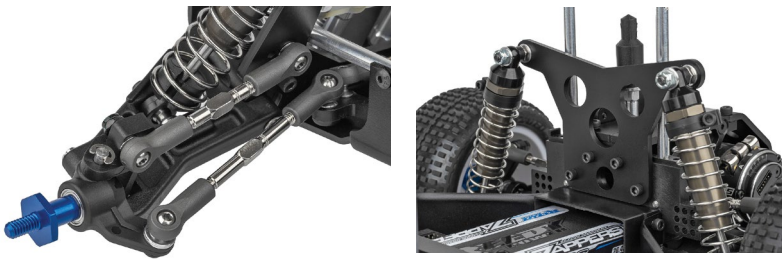

At its core sits a rugged Black Anodized 6061 Aluminum chassis, nose plate, and motor plates—providing the rigid backbone needed for high-torque oval combat.

We've paired the legendary World's Car bellcrank steering with an all-new Stealth Retro Transmission and the V2 slipper system, ensuring every ounce of power is delivered smoothly to the clay.

Precision in the Dirt.

Dominate the groove with a refined suspension geometry featuring durable long front arms, fiberglass shock towers, and Hard Anodized shock bodies. The all-new Factory Team 12mm hex system—from the steering blocks to the B7 wheels—offers a modern, rock-solid interface for maximum traction.

Aerodynamic Dominance.

Cut through the air and plant the rear with the all-new sprint car wing mounting system and signature clear body.

Whether you're tuning with the multiple rear arm mounts or the included 0° and 1.5° hubs, this machine is fully adjustable and race-ready with heavy-duty metric hardware and full ball bearings throughout. World Champion meets the grit of the oval track. This is the RC10 Sprint Car. Own the Oval.

Due to ongoing R&D, photos may not match final kit. Vehicle shown on these pages equipped with items NOT included in kit: Motor, transponder, servos, receiver, wheels, tires. Assembly and painting required.
