

For Immediate Release: May 2025

NEW! Reedy Power RX/Servo Y-Connector 95mm, Black

Reedy Power, a leader in high-performance RC electronics, proudly introduces the latest addition to their product lineup, a 95mm Y-Connector.

Key Features Include:

- Universal Compatibility:** The new Y-connector lead is compatible with a wide range of RC vehicles, ensuring that it can be used with your existing setup, whether you're into on-road, off-road, rock crawling, boats, or aircraft.
- High-Quality Construction:** Crafted with precision, the Y-connector features low-resistance connectors for superior conductivity and resistance to corrosion. Durable insulation ensures reliability and longevity.
- Dual Servo Control:** This Y-connector allows for the connection of two servos to a single channel on your receiver, perfect for applications requiring synchronized servo operation, like steering or dual throttle setups.
- Optimal Signal Integrity:** Engineered to maintain signal integrity, the Y-connector reduces the risk of interference, providing smooth and precise control even in the most demanding conditions.
- Easy Installation:** With a cable length of 95mm, this lead offers enough reach to connect comfortably without clutter and includes + - S markings for easy polarity identification.

Applications:

- ESC Programming:** Provides Fan and Programmer connection options where only a single port is shared for both.
- Dual Servo Setups:** Allows dual servo operation from a single channel.
- Aircraft Control Surfaces:** Where dual servos on a single control surface are used for increased torque or redundancy.

The Reedy Power 95mm Y-Connector Lead is now available online at www.reedypower.com, or at your favorite hobby retailer.
