

For Immediate Release: August 2026

New! RC10B7 FT caged thrust bearing slipper conversion and FT 3-pad slipper hubs

Factory Team presents the RC10B7 FT caged thrust bearing slipper conversion and FT 3-pad slipper hubs! The caged thrust slipper greatly reduces the chances of your slipper nut loosening over the course of your run. A subtle touch of our signature blue to this assembly gives a touch of elegance and lets everyone know you value consistency both on and off the track. The 3-pad slipper is more consistent as well due to its better heat dissipation over the traditional 2-pad system. Be sure to use the bigger diameter spring adapters (#91891). This allows everything to fit properly due to the spring having a shorter length and the three slipper hubs taking up more space than the typical two slipper hubs.

#92594

RC10B7 FT Caged Thrust Bearing Slipper Conversion

Compatible with:

90041/90042/90046/90047

#92595
