

# GREEN GUT GLOW

## SKINELIXIR COLLAGEN BUILDER

### HEALTH FACTS

- Your body begins to lose collagen drastically when we reach our 30's. The effects begin to get noticeable with changes within our bodies.
- Even though this is a natural process, it's possible to speed it up further with UV exposure, pollution, bad habits, and poor diet choices.
- Your skin, hair, nails, teeth, gums, cartilage, bones and gut, all get affected by this decline in your system. You may notice hair fall, thinning hair, brittle nails, bleeding gums, joint pain and more!
- According to Vegan Health 2021, collagen is the most abundant protein in the body.
- Animal collagen is more likely to have contaminants and toxins in it. It is made from hooves, bones and hides of animals. Marine collagen may be high in allergens. Animal based collagen is actual collagen, which your body may accept or reject as a foreign object.

### WHY WE NEED IT

- Arbonne's Vegan collagen builder doesn't contain any collagen, only strictly plant-based ingredients. It is also Halal Certified and Kosher Certified!
- It actually teaches your body to start producing its own collagen again, without using any animal sources.
- Arbonne's collagen builder also contains biotin and hyaluronic acid to hydrate you from the inside out, along with Vitamin C!
