greenverta

Hello!

We are Greenverta, a Promotional Product Manufacturer.

We create, sublimate and sew as green as possible.

We believe that advertising gadgets should be long-lasting, qualitative, and useful, and this is what characterizes our products.

Manufacturer for Advertising Agencies

We have 25 years of experience in the market of advertising industry.

We specialize in sublimation printing on recycled plastic materials aligned with European standards.

During the production process, we focus on environmental responsibility. Our production is rooted in partnerships with trusted Polish and European manufacturers, ensuring top quality, supporting local industries, and reducing our environmental footprint.

Our production

- Certified water based inks
- Responsible waste manage
- Sustainable Packaging
- Energy from photovoltaics panels
- Certified materials mostly from Europe

Description

The Cherry Pillow is a thoughtful promotional product that combines natural comfort, and everyday practicality. Filled with cherry stones, known for their natural ability to retain heat or cold, this pillow offers targeted relief for muscle tension in the neck, back, and shoulders, and can even ease menstrual cramps or soothe aches. Ideal for post-workout recovery or simply warming up on a chilly day, the cherry stones filling provides a natural, eco-friendly touch. This pillow is a wellness essential in every household, making it the perfect branded gift that reflects your brand's care and commitment to well-being. The Cherry Pillow is machine washable, making it both practical and easy to care for.

THERAPY PILLOW • MODELS

COOL Linseed

Linseed filling has a smooth and silky texture, making contact with it very pleasant for the skin. Linseed provides a feeling of gentleness and softness, ensuring comfort over a long period of time. We suggest using it as a cold compress.

FLEX Buckwheat

Buckwheat-filled pillows conform well to the shape of the body. Their natural texture gently massages and supports circulation. Buckwheat allows the skin to breathe, preventing overheating, which is particularly important during prolonged contact with the body.

SOOTHE Mustard Seed

Mustard seeds, due to their hardness and dense texture, offer a gentle massage that improves circulation and gives a stimulating sensation when in contact with the skin. Mustard seeds have warming and anti-inflammatory properties, which can help reduce joint pain.

CALM Wheat

Wheat in seed form is naturally cool and pleasant to the touch, providing a refreshing feeling, especially on warmer days. It also has excellent heat retention properties, keeping warmth for a long time.

THERAPY PILLOW PREMIUM • MODELS

COOL Linseed

Linseed filling has a smooth and silky texture, making contact with it very pleasant for the skin. Linseed provides a feeling of gentleness and softness, ensuring comfort over a long period of time. We suggest using it as a cold compress.

HEAT Cherry stones

Cherry stones are treated as waste but can still be used, because of their ability to retain heat. They have a skin-friendly natural feel. Cherry seeds also provide a cold compress when cooled.

FLEX Buckwheat

Buckwheat-filled pillows conform well to the shape of the body. Their natural texture gently massages and supports circulation. Buckwheat allows the skin to breathe, preventing overheating, which is particularly important during prolonged contact with the body.

SOOTHE Mustard Seed

Mustard seeds, due to their hardness and dense texture, offer a gentle massage that improves circulation and gives a stimulating sensation when in contact with the skin. Mustard seeds have warming and anti-inflammatory properties, which can help reduce joint pain.

CALM Wheat

Wheat in seed form is naturally cool and pleasant to the touch, providing a refreshing feeling, especially on warmer days. It also has excellent heat retention properties, keeping warmth for a long time.

EYE COVER PREMIUM • MODELS

SLEEP Dry lavender

SLEEP Dry Lavender has relaxing and soothing properties, helping to reduce stress. Its fragrance promotes better sleep and relieves headaches and migraines.

RELAX Dead Sea Mineral Salt

RELAX Dead Sea Mineral Salt has a relaxing effect and is rich in micro and macroelements that benefit the skin.

RELIEF Himalayan Salt

RELIEF Himalayan Salt contains many minerals that have a positive effect on health. A warm salt compress may help with blocked sinuses, pain, or inflammation, while a cold can be effective for headaches, migraines, or swelling.

SOOTHE Mustard Seed

SOOTHE Mustard Seeds are known for their natural anti-inflammatory properties, helping to soothe sore muscles and reduce stiffness.

MELLOW Linseed

MELLOW Linseed has a soft, silky texture, making it very pleasant to the touch. It provides a feeling of gentleness and softness, ensuring long-lasting comfort. We recommend using it as a cold compress.

SCENTED BAG

MOQ
100 pieces

Dimensions
100 x 100 mm

Printing
Full-surface sublimation

Bulk Packaging
500 pcs in box 30 x 40 x 50cm, 7 kg

Description

Create a cosy and inviting atmosphere in any space or add a fragrance to your clothes with our lavender-scented pouch. This charming promotional item is not only practical but also offers a touch of elegance, making it a perfect fit for hotels, shops, or even cars. The soothing lavender scent helps to freshen up your surroundings, creating a calming environment wherever it's placed. Additionally, the pouch offers the opportunity for customization, with sublimation printing available on both the pouch itself and the ribbon. This makes it an ideal choice for businesses looking to offer a memorable, scented experience while promoting their brand in a unique and thoughtful way. The product is not suitable for washing.

MATERIALS

Recycled Mesh Soft
100% Recycled Polyester, 60 g/m² +/- 5%

The flexible mesh material is made from soft recycled polyester, and it is guaranteed by the manufacturer to be safe for food storage. It stretches and can hold a lot, plus it offers great advertising opportunities.

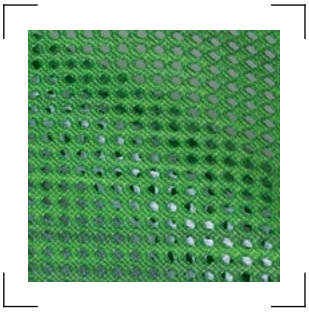

Mesh Light
100% Polyester, 125 g/m² +/- 7 %

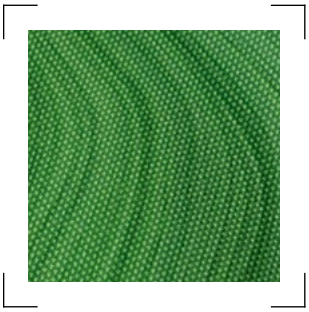

Recycled Mesh Light
100% Recycled Polyester, 125 g/m² +/- 7 %

Mesh Light and Recycled Mesh Light are knitted fabrics, differing in the type of yarn. The second one is made from recycled plastic bottles. Both meshes are resilient and adapt very well to the amount of stuff put in the product. In addition, they are very strong, being able to carry up to a huge load capacity.

Mesh Strong
100% Polyester, 310 g/m² +/- 5%

Mesh Strong is a tough technical knit that is highly durable and capable of carrying heavy loads. It is thicker and tougher to the touch than Mesh Light and Recycled Mesh Light.

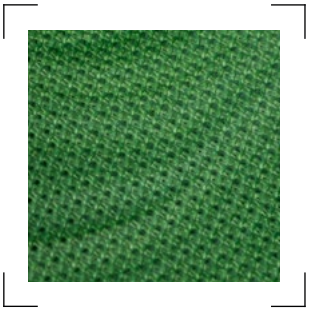

Canvas
100% Polyester, 200 g/m² +/- 5%

Recycled Canvas
100% Recycled Polyester, 200 g/m² +/- 5%

This is a resistant fabric with a canvas weave. It is a versatile material that perfectly holds the form of the product and protects the items hidden inside.

Mesh Stiff
100% Polyester, 252 g/m² +/-6%

This is a thick and resistant fabric with a mesh weave. It is slightly transparent and reproduces colour saturation very well.

greenverta

MATERIALS

Microfibre
88% Polyester, 12% Polyamide, 200 g/m² +/-5%

Recycled Microfibre
90% Recycled Polyester, 10% Recycled Polyamide, 200 g/m² +/-5%

Microfibre is a synthetic fabric made from a thin polyester or recycled polyester fibres. These fibres are much thinner than human hair, which allows microfibre to be highly absorbent, soft, and lightweight. This material is known for its durability, resistance to stains, and quick-drying properties. The print comes out slightly bleached, it's worth taking this into account in your designs!

Silky Microfibre Light
100% Polyester, 180 g/m²

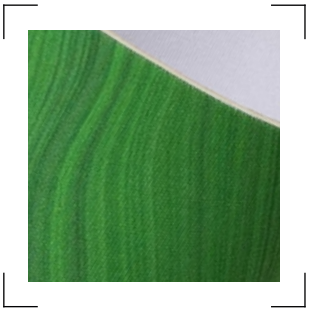

Silky Microfibre
100% Polyester, 220 g/m²

Recycled Silky Microfibre
100% Recycled Polyester, 230 g/m²

Microfibre eyeglass cloths have aesthetic and neat finishes. There are three options to choose from: a thin light cloth, as well as two microfibre cloths made of polyester and recycled polyester. They clean delicate surfaces excellently.

Neoprene
100% Polyester, 530 g/m² +/-10%

Neoprene is a type of synthetic rubber. It is known for its durability, flexibility, and resistance to weathering, chemicals, and temperature extremes. It has water-resistant and insulating properties and good cushioning qualities.

Tube
100% Polyester, 145 g/m²

Recycled Tube
100% Recycled Polyester, 145 g/m²

The fabric is made in the form of a tube, meaning it has no seam. We sublimate this fabric twice flat, first applying the print to one side and then to the other. The print may slightly overlap at the joining point. The yarn can be made of polyester or recycled polyester.

Fleece
100% Polyester, 160 g/m² +/-5%

Recycled Fleece
100% Recycled Polyester, 160 g/m² +-5%

Fleece is made from polyester, and characterised by its softness, lightness and excellent insulating properties. It is warm and pleasant to the touch, yet wicks away moisture well, dries quickly and is easy to care for. We also offer fleece made from recycled fibres.

greenverta

MATERIALS

Fluffy Fleece
100% Polyester, 280 g/m² +/-5%

Recycled Fluffy Fleece
100% Recycled Polyester, 280 g/m2 +/-5%

This material is a type of fleece that has a fluffier texture. It is just as soft, lightweight and insulates warmth perfectly.

Foam Fleece
88% Polyester, 12% Elastane, 260 g/m² +/-5%

Recycled Foam Fleece
88% Recycled Polyester, 12% Elastane, 260 g/m2 +/-5%

A knit fabric that is smooth on one side, allowing for beautiful, vivid prints, and soft fleece on the other. This is ideal for products for the colder months.

Flex
88% Polyester, 12% Elastane, 190 g/m² +/-5%

Recycled Flex
88% Recycled Polyester, 12% Elastane, 190 g/m2 +/-5%

A thin polyester fabric, warm to the touch, that stretches excellently. It is perfect for summer events.

Plush
100% Polyester, 280 g/m²

Plush is a soft, fluffy material with long fibres that has a pleasant to the touch, smooth and warm finish. Thanks to its structure, plush has excellent thermal insulation properties, is pleasant to the touch and looks elegant.

Coolmax®
52% Microfibre Polyester, 48% Coolmax, 135 g/m² +/-5%

Coolmax UV®
52% Microfibre Polyester, 48% Coolmax + UV, 135 g/m² +/-5%

Coolmax® is a high-performance fabric designed to keep you dry and comfortable. Made from moisture-wicking polyester fibres, it quickly draws sweat away from the body, promoting breathability and fast drying. Ideal for activewear and sports clothing, Coolmax® helps regulate body temperature, ensuring a cooler and more comfortable experience during physical activities. Perfect for those who demand both performance and comfort.

Recycled Shoelace Tape
100% Recycled Polyester, 0.078 g/m

The polyester shoelaces are printed on both sides and finished with an aglet. There is no way to match the print - they will be cut at different points in the design. It is therefore worth rethinking the design. The tape is 10 mm wide.

Smooth Tape
100% Polyester, 1520 g/m² +/-2%

Recycled Smooth Tape
100% Recycled Polyester, 1520 g/m² +/-2%

The 40 mm wide smooth tape has excellent colour rendering, the print is sharp and legible.

Ribbed Tape
100% Polyester, 1000 g/m² +/-2%

Recycled Ribbed Tape
100% Recycled Polyester, 1000 g/m² +/-2%

The 40 mm wide ribbed tape also reproduces luscious colours, but its texture does not allow for precise printing of small parts.

Elastic Tape Light
35% Polyester, 65% Latex, 55 g/m +/-5%, flexibility 120%

Elastic Tape Medium
42% Polyester, 58% Latex, 61 g/m +/-5%, flexibility 120%

Elastic Tape Strong
50% Polyester, 50% Latex, 65 g/m +/-5%, flexibility 120%

These bands are made of polyester and latex. They provide resistance during exercises, which allows for increasing the intensity of the workout and engaging more muscles. Depending on the thickness and length of the band, the resistance can be lower or higher, allowing for the adjustment of exercise difficulty to individual needs. The tapes are 60 mm wide.

Additions

ADDITIONS

Zipper Tag
100% Polyester

With a personalized Zipper Tag, you can easily and quickly improve the fastening and unfastening of the zipper. The personalized Zipper Tag is an interesting detail that emphasizes the craftsmanship and prestige of the product. Additionally, it offers another opportunity to creatively display your logo.
Please ask for individual offer: contact@greenverta.com

Canvas label
100% Polyester, 70 x 30-35 mm

The canvas label is a durable and versatile textile tag used for printing a brand logo or claim. Made from high-quality canvas fabric, looks suitable for solid bags.

Satin label
100% Polyester, 30 x 50 mm

This is the smooth and glossy version of the label. Its texture is soft and looks great with smaller products. In addition, it's another place where you can present your brand claim or logo.

Elastic band
width 20 mm

It's a band that you can add to products like the Compact Towel or Ultra Bag. It's useful for tying the product, making it easier to carry in a bag, and, of course, provides additional space to showcase your brand message or logo.

RPET Products

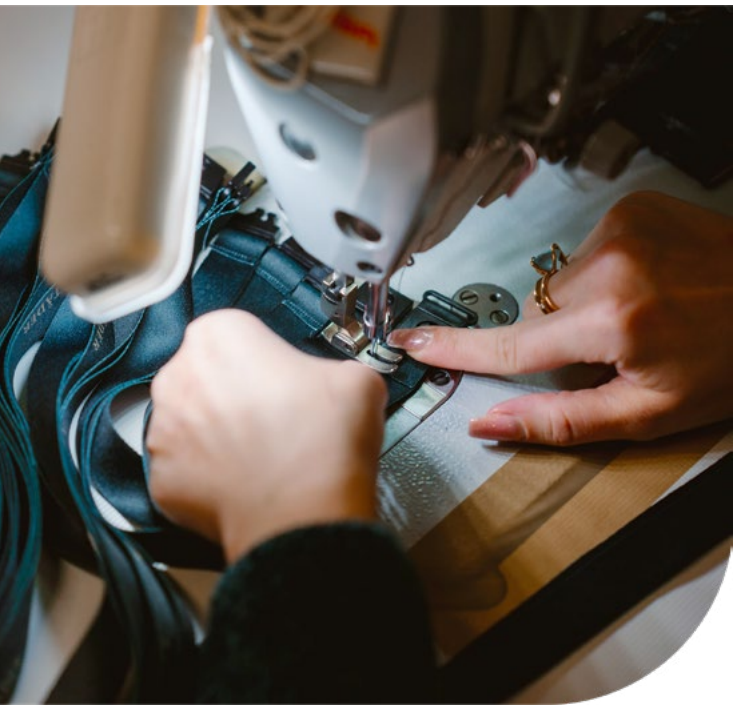

greenverta

RPET PRODUCTS

How our rPET products are made?

Used plastics are collected and taken to a recycling plant, where they are sorted into separate categories: PET, polystyrene, and other plastics. The collected PET bottles are compressed, washed again, and manually sorted to remove potential contaminants, such as organic waste or other plastics. Next, the bottles are sorted by colour.

In the following stage, they undergo flake cutting and are washed once more. This is followed by centrifugation, drying of the flakes, dust removal, and storage for shipment to the recycling contractor. After drying, the PET flakes are subjected to heating at high temperatures. The resulting mass is extruded, forming long pieces with a round cross-section. These pieces are then crushed into pellets, which are transformed into polyester fibre, from which other products are made.

The plastic bottles are collected, sorted, and then shredded and transformed into fibres.

These fibres are used to make recycled polyester fabric.

Once you send us your vision, we will bring it to life.

We use high-quality printing and sublimation techniques.

Next, we carefully sew your personalized product with attention to detail.

Finally, you enjoy a unique, eco-friendly item that's made to last.

Sublimation Printing

greenverta

SUBLIMATION PRINTING

We handle sublimation printing, a technique known for transfer printing. This printing method involves transferring a design from sublimation paper to polyester fabric using pressure and heat (between 180 and 200 degrees Celsius). The (also recycled) polyester fabric is an excellent material for sublimation printing because it has enough pores to perfectly absorb the ink. The inks we use are environmentally friendly, and they can be used for food storage.

Sublimation printing offers significant advantages — it does not fade or peel. This is because the ink is absorbed by the material rather than remaining as a layer on the surface of the fabric. This means that sublimation printed fabric can be washed as many times as desired, and the design will remain clear and intact because it is durable and resistant to chemical factors.
