

Nathaniel Brown, Director of Enterprise Analytics and Data Science, Scripps Health

Nathaniel Brown is a seasoned health informatics leader with over 15 years of experience in electronic medical records (EMR), health data management, and healthcare IT. He currently serves as the Director of Enterprise Analytics and Data Science. Nathaniel has led the successful implementation of EMR systems and interoperability efforts across hospitals, community-based organizations, and home health agencies—leveraging regional health networks and various technical interfaces to enable seamless clinical data exchange.

Previously, he was Assistant Director and Project Manager for Epic implementations at New York City's public hospital system, the largest municipal healthcare network in the country. He also served as Director of Information Services and Population Health, where he delivered the IT infrastructure supporting all facets of two major hospital networks' activities under a \$100 million Medicaid-funded, value-based care transformation initiative.
