China, the global ferroalloy powerhouse, is in the spotlight. Its manganese, nickel, and chromium industries are now fueling the thriving new energy battery sector. Breakthroughs in technology and quality are transforming the landscape. Meanwhile, molybdenum, tungsten, niobium, vanadium, and other alloys maintain strong positions globally. While China reduces steel production, it champions the new energy frontier and advanced materials.

Join us at the Mysteel International Ferroalloys and Stainless Steel Industry Annual Conference, where over 500 industry leaders, including government bodies, top corporations, and service providers, converge. Be a part of shaping the future of our dynamic industry together.

The free online broadcasting is powered by Zoom and features English simultaneous interpretation.
