Franchised: 2014

Additional Details

Sanondaf is Europe's first disinfection & decontamination franchise to enter the U.S., offering professionalism and an environmentally safe approach to destroying up to 99.9999% of harmful bacteria, viruses, fungi, molds and yeast, in fact more effective than typical hospital grade disinfectants. We have expanded to 8 countries already and are have now opened up the U.S.

Made in the USA, the system is a whole room disinfection / decontamination system via a fogger device or electrostatic spray process to apply hydrogen peroxide vapor (HPV) to all surfaces and space within an area. The process achieves up to a 6-log kill (99.99% to 99.9999%) – using spore strips as validation - and is delivered dry so it can be used on any type or surface materials including electric-powered instruments, electronics and specialist lab equipment. Treatments are validated using chemical indicators and a treatment certificate is provided at the end of each process. Rooms can be returned to full use by staff members in as quickly as 30 minutes and there is no need to power down any electronics or other instrument.

Our approach quickly and effectively irradiates pathogens such as Coronavirus, Norovirus, H1N1 and H5N1 (flu virus), Clostridium Difficile (C-Diff), Escheria Coli (E-Coli), Staphylococcus aureus (MRSA, S. aureus), and many more. Current customers are in hospitals, life sciences, assisted living facilities, schools & universities, children's daycare, veterinary hospitals, office and work environments, events industry, gym & fitness centers, hotels, transportation, restaurants and farms.

WHY Sanondaf?

Industry Leaders, Tried and Tested
